IOAI Accredited Organization – Website Guidelines

Each IOAI Accredited Organization must maintain a public webpage that clearly and transparently communicates its national selection process for the International Olympiad in Artificial Intelligence (IOAI). The page should be kept up to date each cycle and archived (not deleted) once a cycle concludes.

---

1. National Selection Process

1.1 Timeline

- Publish key dates for **every round** of the selection process (e.g., registration deadline, qualifying round, camps/trainings, final selection test).
- Indicate the expected date of team announcement, relative to the IOAI competition date.
- Update the timeline promptly if any dates change.

1.2 How to Participate

- Eligibility criteria (age, grade level, citizenship/residency, etc.).
- Registration process: where and how to sign up, registration link or contact.

1.3 Selection Criteria and Transparency

- Describe how candidates are evaluated at **each stage** (e.g., written exam, coding/ML task, etc.).
- State weighting or thresholds used to advance between rounds, if applicable.
- Availability of the results of all stages of the national selection process
- Note how the final team (and reserves, if any) is determined.

1.4 Fees

- Disclose any participation, registration, or training-camp fees for each round.
- If there are no fees, state this explicitly ("Participation is free of charge").
- Bear in mind that according to Regulations *No institution or individual should charge payments or fees with the intent to profit during any stage of the selection process. Collection of **nominal fees** is permissible only if they are strictly to offset expenses related to accommodation, travel, and the actual costs of the competitions without any profit being made*.
- Note any fee waivers, scholarships, or financial assistance available.
- The competitions used to select teams must be nationally/territorially inclusive, ensuring that **all students have the opportunity to participate** regardless of their social status.

---

2. Information on Previous Participation Cycles

For each past cycle, publish:

2.1 Selection Summary

Brief description of how students were selected that year (process actually used, including any deviations from the standard process).

2.2 Participation Results

- Names (or number, if privacy requires) of students who represented the country.
- Results/medals/rankings achieved at IOAI.

2.3 Grant Acknowledgement

- Clear acknowledgement of any grants, funding, or support received (e.g., from IOAI, sponsors, government bodies) that enabled participation.
- Include funder name/logo where required by grant terms.

---

3. General Presentation Guidelines

- Keep the page in a language accessible to your target student population (native language and/or English).
- Maintain a clear, dated changelog or "last updated" note for transparency.
- Provide a contact point (email) for prospective participants' questions.
